

*Full-time Healthcare Services students can earn a certificate in one semester!
Part-time students can finish in a year.*

We teach you the entry-level skills needed to work in hospitals, physicians' offices and other medical facilities in areas including: nursing assistant, optometric aide, phlebotomist, EMT, EKG Technician, personal care giver, nutrition aide, physical therapy aide, and sterile processing technician.

You will leave this program with a better idea of the different professions on a health care team and the courses you select prepares you for an entry-level career in healthcare.
