

Professional Truck Driver Training

» southeast.edu

- » SCC's Professional Truck Driver Training program works in cooperation with donation distribution centers across Nebraska to haul goods between various locations. Each class participates in two to three live loads, giving students real experience prior to completing the program!
- » The Professional Truck Driver Training program theory course meets the Federal Motor Carrier Safety Administration (FMCSA) Entry Level Driver Training (ELDT) and HAZMAT Theory requirements. After successful completion of this course, students can complete skill and driving training and testing through SCC or another third-party tester, including your local DMV.
- » Students have the opportunity to train on a variety of equipment to prepare them for any job. SCC regularly gets new equipment for our students to train on and also is one of the only schools with manual transmissions available for student learning.
- » SCC's program is affordable! The program qualifies for the GAP Assistance Program (southeast.edu/gap). The Nebraska Trucking Association also offers significant scholarship opportunities. See the program website for more information.
